

Project: Haleakala Highway Improvements, Route 377
Island of Maui

Project No.: TBA

BACKGROUND

Project Location: The proposed improvement is located on Haleakala Highway (Route 377) at the intersection of Kula Highway on the Island of Maui. The improvement is located at mile marker 0.253 on Route 377.

Project Purpose: The purpose of the project is to design a right turn lane on west bound Haleakala Highway including walkways and paved shoulder. In addition, construct sidewalks from the intersection to King Keakaulike High School entrances, traffic signal improvements, signage, and markings.

DESIGN SCOPE OF SERVICES

The scope of services for this project shall include, but not be limited to the following: preparing the required environmental documents according to Hawaii Revised Statutes 343 (including environmental assessment, if necessary); preparing all documents which apply to the federal process (i.e. NEPA, Section 106, Categorical Exclusion, etc.); preparing 60%, 90%, and 100% plans, specifications, and estimates for all construction work, including roadway plans, grading plans, structural plans, traffic control plans, plans for traffic loops, plans necessary for right-of-way acquisition or for construction parcels, etc, preparing reports such as basis of design, geotechnical, drainage (including hydraulic, hydrology, and scour), etc; coordinating utility relocations with the respective utility companies; and coordinating work with all applicable government agencies.

The scope of services also includes: scheduling and conducting public informational meetings, applying for, and obtaining all necessary permits for construction; developing permanent best management practice measures, if necessary, to comply with Environmental Protection Agency and Department of Health regulations (during the construction phase) and other required environmental regulations.

TOTAL DESIGN TIME: 6 – 8 Months
